

# Conference: Science into policy, improving uptake and adoption of research

Sponsored by the OECD's Co-operative Research Programme on Biological Resource Management for Sustainable Agricultural Systems

BIOSECURITY FLAGSHIP  
[www.csiro.au](http://www.csiro.au)

We are bringing together national and international biosecurity scientists, regulators, policy developers and social scientists to explore the issues surrounding the uptake and adoption of scientific outcomes.

Researchers and policy makers have recognised there is a disconnect between the cutting edge of research and conservative science-driven regulatory systems.

This conference will focus on identifying the reason behind this disconnect and look at ways to improve the uptake of biosecurity research outcomes into policy.

Key focus areas include:

- Focus on agricultural science into health policy
- Improving the connections between science and policy
- Regulation and research

The conference will consist of a welcome reception on Monday evening (11 November), a keynote address by Dr Stephen Goldson and plenary sessions. Our conference will also include a formal dinner on Tuesday 12 November.

This conference forms part of the CSIRO Biosecurity Flagship's commitment and contribution to national biosecurity research in collaboration with other research agencies, State and Federal Governments and international partners.

## DATE

12 - 13 November 2013

## VENUE

Ecosciences Precinct  
41 Boggo Road, Dutton Park  
Brisbane, Queensland

## REGISTER
